

Shah Abul Kalam A K

Adaptable Web developer pursuing cloud computing and expanding expertise in design, development, and technology.

Experience

Creative Designer at **Duolearn** Nov 2022 - Present

- Developed design assets for marketing campaigns, increasing brand visibility & engagement across social platforms by 80%.
- Created engaging visual content using Adobe Premiere Pro to enhance the company's branding and user experience.
- Collaborated with the Founders to ensure cohesive visual communication, improving overall design consistency across web and social media platforms.

Featured Projects

HomeProtein | homeprotein.in

WEB DEVELOPMENT | DEC 2023

- Developed HomeProtein's website using Next.js and Tailwind CSS, delivering a fully responsive and user-friendly interface.
- Integrated Razorpay and Instamojo payment APIs to streamline transactions, enhancing user experience and business operations.
- Optimized the website's performance and added Nodemailer for robust email functionality, improving site load times and communication efficiency.

Fintech Leonidas | fintech-leonidas.vercel.app

BANKING WEB APPLICATION | SEP 2024

- Developed Fintech Leonidas, a banking app using Next.js with Server-Side Rendering for scalability and dynamic rendering to handle high traffic efficiently.
- Integrated Appwrite for secure authentication and database management, and utilized the Plaid API to offer real-time financial data access, including a sandbox mode for testing transactions without real funds.
- Deployed the app on Vercel, ensuring optimal performance and real-time financial insights, delivering a secure and responsive platform for seamless transactions.

Flavia - VS Code extension | flavia-theme.vercel.app

WEB DEV & COLOR THEORY | NOV 2023

- Published the "Flavia" color theme extension for Visual Studio Code, enhancing readability with a clean, ergonomic design.
- Developed a dedicated webpage to showcase the Flavia theme, providing users with an intuitive experience to preview and download the theme, along with descriptions and visual highlights.

Memoria | memoria-public.vercel.app

CRUD WEB DEVELOPMENT | JUNE 2024

- Developed a CRUD application for storing "memories" on stylish memory cards, featuring image uploads, updates, and favorites management, while utilizing Firebase for dynamic storage to enhance data management.
- Integrated NextAuth with Firebase Authentication, including Google authentication, to ensure secure user authentication and robust data protection.
